

YOUR CAREER PATH undecided?

If you aren't sure about a career path and are seeking experience surrounded by a team of professionals and mentors, we have a place for you.

The rural veterinary shortage is a crisis in America. While a shortage of rural veterinarians is well publicized, the shortage also impacts all supporting staff, from veterinary technicians to administrative professionals.

The Ashland Veterinary Center team offers expertise and mentorship to the next generation of professionals considering a career in animal health, reproduction, genetics, nutrition and best practice small business administration.

Ashland Veterinary Center is a diversified animal practice in southwest Kansas. AVC provides quality care of large and small animals in a four-state region, serving registered and commercial beef operations, feedlots and companion animals and their owners.

If you are undecided about a path forward to a lifelong career, we encourage you to consider AVC as the first step toward a bright future.

Candidates will succeed if they are curious, self-starters, quick learners, play well with others and have a passion for making a difference.

WHO'S THE PERFECT CANDIDATE?

- Intern seeking animal health experience
- Student seeking degree in animal science or related field
